

Please reject the NAB's petition 04-160 from discontinuing XM Satellite Radio's broadcasting weather info. I listen to XM Radio and feel safer when I can instantly find the weather conditions in my area. My community does not sound tornado alarm until it's sited in area. As far as I'm concerned that can be too late, and recently the siren malfunctioned and didn't work. That's when a tornado hit Utica, Il and killed 8 people this April 2004. Thank you for considering my request.
